Normal Operations	Level 3	Normal Operations	Normal Operations

February Winter Storms

- A strong storm system is currently impacting California. Storm activity is expected to continue through Friday, 02/15/19. Increased concerns exist for significant impacts in, and around, the burn scar areas and foothills. Debris flows are possible due to the chance of increased precipitation over the next couple of days. Thursday is expected to see the heaviest rainfall rates with the possibility of thunderstorms also affecting northern California. Reservoirs are capturing the majority of the run off, however flood stages expected to be exceeded on multiple rivers. See River Forecasts and Flooding for specific rivers and locations.
- Cal OES Duty Officers are monitoring weather and maintaining close contact with their Operational Areas (OAs).

Storm Impacts

Coastal Region

Mudslide in the City of Sausalito, Marin County

- At 0300 hours, a Mudslide occurred in the City of Sausalito in Marin County. Approx. two homes were destroyed. One victim was removed and transported. The City of Sausalito and the County of Marin were activated at the lowest level. At this time they are both deactivated. Locals are working to access the stability of the mountain. [Soils engineers and emergency resources are currently evaluating stability and safety in the area.](#)

Potential Levee Breach at Montezuma Slough, Solano County

- The Department of Fish and Wildlife reported eminent levee breach at the Montezuma Slough within five days and ordered a hand crew from Delta Conservation Camp No. 8 which is jointly operated by Cal Fire and CDCR. If the levee were to breach it would have environmental impacts on the largest brackish water estuary on the west coast, flood the Fish and Wildlife headquarters present on site, and over 150 private duck clubs. The Department of Fish and Wildlife is procuring its own materials (sand and plastic) mitigate the breach. Mission Request #57662.

Prepositioning of Resources and Personnel by Flood Operation Center (FOC), Department of Water Resources (DWR)

- In northern California, Thursday night snow levels are forecast to fall to as low as 2,000 feet and precipitation above the reservoirs should fall in the form of snow, limiting runoff. The forecast now expects more rainfall and runoff in the Russian/Napa and Sierra Nevada areas than previously expected through Thursday night.
- In Southern California, the forecast now expects more rainfall and runoff than previously expected through Thursday night, including strong winds Thursday morning. Snow levels will be dropping 6500-7500 feet on Thursday night.
- The next weather and hydrology briefing is scheduled for 1000 hours on [Friday, 02/15/19.](#)
- The CA NV River Forecast Center will be extending staffing hours Thursday, possibly longer, and issuing additional river forecast bulletins as the storms move through the state.
- The FOC will be monitoring forecasts, updating river recordings, and participating on various weather-related conference calls.
- During the Merced County coordination call, Merced County stated the moisture plume went further north and they are not receiving as much rainfall as expected.
- On Thursday morning, flood fight specialists will be in key areas of the flood control system to observe its response to the heavy precipitation.
- DFM Inspection staff is travelling to the following locations to inspect areas of interest today, and will inspect other areas [today 02/14/19:](#)
 - [Bear River, Cosumnes River, American River, Feather River, and Arcade Creek.](#) No problems have been identified at this time.
- Sutter Maintenance Yard is performing levee patrols on Cherokee Canal, and operating pumping plants on the Sutter Bypass at Plants 1, 2, and 3.

Southern Region

Potential Isolation of Idyllwild, Riverside County

- There is a potential for the town of Idyllwild in Riverside County to become isolated due to the closure of Highway 74 and Highway 243. Both highways are experiencing full closures, with unknown estimated times of reopening. This is a full service community and should be able to function properly unless the road systems are closed for long duration. Residents are currently sheltering in place and there are three care and reception centers open. Caltrans engineers are currently assessing the extent of the damage. Highway 74 to Highway 371 is open to Emergency Vehicles only.

WEATHER OF CONCERN

NORTHERN CALIFORNIA

- Very wet and unsettled conditions will continue with precipitation becoming light to moderate across the Southern Sierra Nevada. Unsettled conditions will be possible through the weekend.
- Winter Storm Warning in effect for heavy snowfall in the Sierra Nevada above 4000 feet.
 - Snow will make travel difficult and cause travel delays and road closures. Tire chains and cables may be required.
- Very wet and unsettled conditions will continue with precipitation becoming moderate across the Southern Sierra Nevada. Unsettled conditions will be possible through the weekend.
 - Moderate to sometimes heavy precipitation is likely across the Sierra Nevada and adjacent foothills during the next 24-36 hours. Snow levels will be above 4000 feet through this afternoon.
 - Showery precipitation is expected today with snow levels lowering to 1500 to 2500 feet by Sunday.
 - Gusty southwesterly winds are expected through and below passes in the Kern County Mountains. Gusts up to 55 mph with locally higher gusts through and below the passes in the Kern County Mountains and desert areas.

SOUTHERN CALIFORNIA

- A series of 3 storms will move across the region this weekend. The first two are weak systems. The first one will bring showers later today through this evening. The second one is weaker and will bring scattered light showers Saturday afternoon and evening. The strongest one on Sunday afternoon and Sunday night will bring moderate showers with rain rates up to 0.50" for a short time.
 - Snow levels will steadily lower through the weekend to 3,000 to 3,500 feet.
 - Dry weather Monday and Tuesday.

WEATHER KEY POINTS

02/15/19 - 02/21/19

Friday-Sunday

- Periods of rain showers and isolated thunderstorms again possible across northern CA Friday and Saturday, and along the central and southern coast for Sunday
- Gusty southwest winds with gusts to around 55 mph will create difficult driving conditions, tree damage and potential for power outages across the mountains and desert areas of southern CA today and Friday night.
- Rises in creeks and streams from recent heavy rains and snowmelt will result in continued urban and small stream flooding across much of the state Friday
- Minor main stream river flooding diminishing northern California (Sacramento River at Ord Ferry and Russian River at Guerneville)
 - No additional flooding concerns expected this weekend
- Continued difficult travel conditions across the Sierra and northern CA mountains due to periods of significant additional snowfall accumulation through the weekend
- Snow levels lowering to around 3500 feet in the southern CA mountains may create travel impacts across southern CA mountain passes (Grapevine on I-5) tonight and possibly again Saturday night as periods of showers move through

Monday-Thursday

- Much colder than normal conditions expected, with potential impacts to agricultural interests from sub-freezing temperatures
- Dry conditions appear likely across the state with no significant precipitation related impacts expected
